I am passionate about software engineering and enjoy solving problems in a logical way. I have been at BUUK for almost 4.5 years and in this time, I have integrated new features in the style of the existing code base, taken on a mentorship role and given many technical talks to colleagues; I am able to adapt my language about complex areas of the system to suit graduates and non-technical colleagues, while keeping the topic engaging.

I am confident at basic coding in different programming languages and enjoy upgrading components in my PC - a hobby I have helped many friends with. I hold a full, clean UK driving licence and have access to a car.
